

**Atmos**  
RENEWABLES

# Teebar BESS Community

May 2025

## We want to hear from you!

Atmos will be exhibiting at the **Fraser Coast Industry and Careers Showcase 2025** on Wednesday, 4th June. Come visit us to learn more about the exciting job opportunities available in renewable energy projects.

Additionally, Atmos is proud to sponsor this year's **Teebar Rodeo and Show** event and we will be there to connect with the community in June. Drop by to share your ideas and learn about community investment opportunities.

We are also setting up our Community Benefit Fund and we want to hear from you if you want to

- a) Help us design a scheme and identify local needs and priorities
- b) Have a business or project that could benefit from our fund
- c) Are a local business interested in contracting opportunities

## Key Benefits of the Project

- A \$2million community benefit sharing scheme will be established over the 25 year lifespan of the project to provide sponsorship towards local causes and investment in Teebar organisations that enhance educational, environmental, cultural and health initiatives.
- Approximately 100-150 jobs during construction and 2 full-time permanent jobs during operation will be created which will have direct and indirect flow-on economic benefits to the wider region.
- Local contracting opportunities for First Nations and local suppliers to share the benefits of the project, particularly in civil works and fabrication.
- Direct investment into education and skills training in the energy sector, including work readiness initiatives in local schools and providing improved training opportunities for renewable energy jobs across the Wide Bay Region.
